MAHIDUL ISLAM MUKTO

Senior WordPress & Shopify Developer | AI-First Development | Custom Themes, Plugins & E-commerce

Selangor, Malaysia | +60 17-764 9506 | muktowp@gmail.com
Portfolio: mukto.info | LinkedIn: linkedin.com/in/muktoapb | GitHub: github.com/muktoapb | WordPress.org: profiles.wordpress.org/muktoapb

PROFESSIONAL SUMMARY

Senior WordPress and Shopify Developer experienced in building custom WordPress themes, plugins, WooCommerce solutions, Shopify themes, Gutenberg interfaces, and scalable content systems. Uses an AI-first development workflow for technical planning, rapid prototyping, implementation, debugging, documentation, and code review, while independently validating output for security, performance, accessibility, maintainability, and platform best practices. Strong in PHP, JavaScript, Liquid, MySQL, Git, responsive frontend development, hosting management, and client delivery.

CORE SKILLS

AI-First Development
AI-assisted architecture, prompt-driven prototyping, coding agents, debugging, code review, documentation, human-in-the-loop validation

WordPress Engineering
Custom themes and plugins, Gutenberg, ACF, hooks, custom post types, taxonomies, REST API, coding standards

Shopify Theme Development
Liquid, custom sections and blocks, product and collection templates, metafields, theme customization, responsive storefronts, app integration

WooCommerce
Custom checkout and cart flows, product functionality, memberships, subscriptions, payment and business workflows

Frontend
HTML5, CSS3, SCSS, JavaScript ES6+, jQuery, responsive design, Tailwind CSS, Bootstrap, UI implementation

Backend & Data
PHP, MySQL, WordPress database, API integration, debugging, scalable and maintainable code

DevOps & Delivery
Git, Docker, WHM, cPanel, deployment, performance optimization, security, maintenance, client support

Design-to-Code
Responsive implementation from Figma and other design files for WordPress and Shopify websites

PROFESSIONAL EXPERIENCE

Senior WordPress Developer
WP Pro Devs | 2022 - Present

- Build stable, performance-focused WordPress websites using custom themes, plugins, Gutenberg, ACF, Elementor, and WooCommerce.
- Develop and customize Shopify themes using Liquid, reusable sections and blocks, product and collection templates, metafields, JavaScript, and responsive frontend development.
- Apply AI-first workflows to accelerate requirements analysis, architecture planning, prototyping, coding, debugging, documentation, and iterative delivery.
- Review AI-assisted output for security, accessibility, maintainability, performance, and compliance with WordPress development standards.
- Translate business requirements into practical technical solutions, manage multiple projects, and communicate directly with clients.
- Support junior developers through implementation guidance, debugging, code review, and WordPress best-practice recommendations.

Senior WordPress Developer
Techzu Ichicode | 2019 - 2022

- Developed and customized WordPress websites to meet client requirements and project specifications.
- Integrated custom WooCommerce functionality to improve e-commerce workflows and user experience.
- Managed WHM and cPanel environments, supporting website security, reliability, and performance.
- Troubleshooting WordPress, theme, plugin, hosting, and performance issues across client projects.

MAHIDUL ISLAM | PRODUCTS, AI WORKFLOW & EDUCATION

SELECTED PRODUCTS & PROJECTS

Toolis - Developer Tools Platform

Founder / Developer | toolis.dev

- Built and maintained a curated platform of 50 browser-based developer tools across formatting, encoding, generation, testing, visual design, PDF, image, and time-related categories.
- Designed core tools to run locally in the browser, allowing users to work without signup while keeping input on the user's device.
- Applied AI-first development for product planning, rapid prototyping, feature implementation, debugging, content creation, and iterative improvement.
- Developed the product as part of the WP Pro Devs ecosystem with free core utilities and optional account-based features.

Advanced Email Filter for Elementor Forms

Plugin Author | https://wordpress.org/plugins/advanced-email-filter-for-elementor-forms

- Developed and published an open-source WordPress plugin that adds advanced email validation and spam protection to Elementor Pro forms.
- Implemented global and per-form blocklists and allowlists, wildcard matching, business-email filtering, and disposable-email blocking.
- Added extensibility through WordPress hooks and configurable validation behavior.
- Maintained the plugin architecture, releases, documentation, testing, compatibility, and user support; the plugin is listed with 100+ active installations.

AI-FIRST DEVELOPMENT APPROACH

- Turn business requirements into structured technical plans, implementation steps, and acceptance criteria before development.
- Use AI coding agents as development collaborators for ideation, scaffolding, refactoring, debugging, tests, and documentation.
- Keep architecture, security review, code validation, production testing, and final technical decisions under human control.
- Use context-rich prompts and iterative feedback to improve consistency, identify edge cases, and reduce repetitive work.

SPEAKING & COMMUNITY

Speaker - WordPress Campus Connect UPM 2026

Universiti Putra Malaysia, Serdang | 25 July 2026

- Presented "Vibe Coding a Fully Functional WordPress Website," demonstrating AI-assisted prototyping, theme development, editable content integration, and iterative delivery while emphasizing that AI complements rather than replaces core engineering knowledge.

EDUCATION

Master of Software Engineering

Universiti Putra Malaysia (UPM) | 2025 - Present
